EDUCATION

Galgotias College of Engineering and Technology

July 2025

B. Tech Artificial Intelligence and Machine Learning

St. Joseph's Convent School

April 2020

COURSEWORK

Courses: Data Structures & Algorithms, Operating System, Object-Oriented Programming, Database Management System

SKILLS

Languages: JavaScript/TypeScript, C++

Framework/Skills: NodeJs, ReactJs, ExpressJs, NextJs, Tailwind, NextAuthJs, PostgreSQL

DevTools: Git, Prisma, Docker, VSCode

PROJECTS

testify.xyz | *Next.js, Typescript, Tailwind, Prisma, Shadcn, NextAuth*

- Interactive platform for businesses to collect and showcase user testimonials, enhancing credibility and trust.
- User authentication implemented with NextAuth.js and Recoil for state management, ensuring a secure and responsive user experience.
- Customizable review forms allow businesses to tailor feedback collection based on their unique needs.
- Public testimonial page generator where users can view and leave reviews, driving engagement.
- Dashboard for managing testimonials and insights, designed with a focus on UX and accessibility..

finance.xyz | *Next.js, Typescript, Tailwind, Drizzle, Hono, Shadcn, Clerk*

- Developed finance.io, an app for managing accounts, categorizing transactions, and visualizing CSV data.
- Implemented OAuth using Clerk for seamless user registration and login.
- Engineered features for users to create multiple accounts, categorize transactions, and manage transaction entries.
- Integrated functionality to distinguish and display transaction types as withdrawals or deposits.
- Enabled CSV file upload and parsing to dynamically render transaction data on the platform.

stacktrack.xyz | *Next.js, React, Prisma, Tailwind, TypeScript, Clerk*

- Architected Stacktrack, a full-stack web application providing Kanban-style project management features.
- Built a dynamic React frontend using Next.js for performant rendering, interactivity, and SEO benefits.
- Integrated Clerk.js to provide streamlined user authentication, including sign-up, login, and profile management.
- Designed a relational database with Prisma ORM, ensuring data integrity and efficient querying.
- Prioritized a clean and responsive UI/UX to promote a streamlined collaborative workflow.

CERTIFICATION

100xDevs

Fullstack Development

June 2023 – Dec 2023
